Interactive Sports and Play Equipment

Unique play solutions that are up to date with the times we live in
Dear sir/madam,

Thank you for your interest in our interactive sports and play equipment. With pleasure, we provide you this project budget estimation.

Hopefully this will give you sufficient information to your questions, but probably also a lot of new questions will occur. Therefore, the export service team is on hand to answer all your questions and to ensure you are not left with any uncertainties.

We hope to start a process together to create an environment that inspires us all to play, to be active and most importantly to enjoy and have fun together.

Please feel free to contact us directly.

A new way to play

Over 35 years of play

Yalp started in 1980 in the Netherlands. In 2000 Ben and Irmgard Admiraal bought the company and started off on an entrepreneurial adventure, joined by just 4 employees. By now, Yalp has become a market leading, internationally operating company with over 40 employees. And we are only getting started. The secret to our success is our company culture.

We are a group of friends - but made up of professionals. This attracts ambitious new talent with an entrepreneurial spirit, who are proud and helpful, self-critical, forward thinking, friendly, and customer service oriented. We share one main belief: the belief in PLAY. The ‘Why’ of our organizational existence.

Today, I am incredibly proud to be able to say that we have succeeded in developing high tech interactive play concepts, that meet the demands of today’s world. The concepts have so far been sold in many countries all over the world, from US to China and from Europe to New Zealand. We are putting our efforts into innovative solutions, and we are not afraid of leading the way.

The origins of interactive play

The name YALP is PLAY in reverse. Yalp creates sport and play areas that fit the philosophy of ‘a new way to play’. With equipment that fit the needs and desires of present day.

The world is constantly evolving. Children and adults of today are used to smart phones, tablets and computers. The way kids experience and what they demand of outdoor playing these days is hugely different from how it used to be. Interactive playsets combine the positive aspects of video games (excitement, hand-eye coordination, problem solving skills and creativity, sharing the joy of competition) with the positive aspects of outdoor play (being outdoors, exercise, pushing limits and the development of social skills). The Yalp interactive playsets combine “the best of both worlds” into one.

Yalp launched World’s first interactive playset in 2007, with great success: The Yalp Sona Play arch. Soon thereafter the Yalp Sutu, Yalp Fono, Yalp Memo and Yalp Toro followed suit. Today, over 400 parks, schoolyards, healthcare institutions, public areas, shopping malls, indoor playcenters and holiday parks worldwide, carry the Yalp interactive playsets.
Why interactive?

Of kids between the ages of 5 and 12 get less than one hour of outdoor play time per day

Three out of four British children spend less time outdoors than the average prison inmate

Source: The Guardian, Friday 25 March 2016 07:00 GMT

We live in a rapidly changing world with increased digitalisation. Interactive play is the link between the digital and real world. The game world challenges, brings variety, innovation. The real world brings, among other things, physical exercise outdoors and social interaction. With our interactive products, we are meeting the demands of this new reality and the new generation, while ensuring the benefits of outdoor play. Interactive play merges the entertainment value of video gaming with the best of healthy outdoor play. So the best of both worlds. Our interactive products bring the solution towards today’s challenges. Let’s be honest, a swing or slide simply isn’t enough to challenge today’s generation anymore.

Traditional playgrounds and sports fields still serve a wonderful and important purpose, which ought to stay this way. However, the group of kids that do not seek exercise and outdoor play by themselves can be enticed to do so through interactive play sets. Not just moving around, but active exercise is what ultimately leads to the desired benefits and reduction of public health issues. Increasing the prevalence of outdoor play is a tangible and effective way in which the administration can meet its public health aims. A healthy community can lead to reduced healthcare costs in the long run as well. Beneficial on the short term, as well as into the future.

Honours and awards

The unique play solutions of Yalp are internationally recognized. Yalp has won quite a number of national and international awards over the years. One of the most prestigious is the Reddot Design Award, 2014.

- Pleasureworld Novelty Award 2006 - Yalp Sona Play arch
- Leisure & Sport Totaal Award 2009 - Yalp Sutu Football wall
- Pleasureworld Novelty Award 2009 - Yalp Sutu Football wall
- Pleasureworld Novelty Award 2012 - Yalp Fono Dje booth
- Building Holland Award 2012 - Yalp Sutu Football wall
- EU Profit Innovation Award 2013 - Yalp Memo Activity zone
- Red Dot Design Award 2014 - Yalp Fono Dj booth
- World Trade Center Export Award 2016
- Oranje Handelsmissie Fonds Award 2016
Interactive play sets all greatly exceed their traditional counterparts in terms of exercise intensity. The research statistics below show the movement intensity of the Yalp Sona play arch and Yalp Toro sports court in comparison to other sports. The statistics are measured in MET value, which stands for Metabolic Equivalent and is a unit of measure within physiology. One MET is equal to a person’s metabolic rate while sitting or resting. The Yalp Sona “ReactionRace” game achieved more than 10 MET points, which makes it more active than biking (MET 4.5), Basketball (MET 6), running (MET 6.2), or non-competitive Football (MET 7).

www.yalpinteractive.com/Fono
The Yalp Fono outdoor DJ-table meet the demands of teenagers, like their perpetual use of the mobile phones, the listening to and sharing of music, and of course socializing and hanging out with friends. The Yalp Fono works very simply: have music playing from your phone speakers, and place it on the designated spot on the DJ-table. The Yalp Fono picks up the sounds, and amplifies it. Next, music can be mixed and effects can be added just like a professional DJ. The Yalp Fono stays up to date, as teenagers bring their own music.

Function examples

- **Pitch**
  Filter high and low tones

- **Loop**
  Record 10 seconds of music and play on repeat

- **Delay**
  Delay and echo the music

- **Scratch**
  Create the famous DJ scratching sound by wiggling the pads

- **Crossfader**
  Adjust the balance between two channels

The Yalp Fono contains 4 channels for mixing (two live channels from the mobile phones, and two channels with saved loops). Check out all features and effects on www.yalpinteractive.com/fono
Yalp Fono Design edition

Properly equipped public area facilitate an encourage social cohesion. In collaboration with urban and park furniture producer Grijsen, Yalp developed the ‘Design edition’ of the Yalp Fono. Solid wooden street furniture is joined to steel frameworks and concrete bases, and of course the outdoor DJtable, which turns ‘regular’ open area into a true asset.

The combination of wood, concrete and steel gives this design edition a tough, solid, yet refined look. The Yalp Fono design edition is available in various pre-combined models; A, B, C, D and J, but also in indivually customizable elements. This allows you to “build your own Yalp Fono Dj booth.” The concrete DJ-Table is the base, to which one or multiple benches, chill bars, tables, and even a dancefloor can be added. Plane II is a furniture line with a solid and modern look. Thanks to its rounded corners it exudes a friendly character.

Ask us about all Yalp Fono design options and prices.

Yalp Memo

The Activity zone

Besides an exciting and fun play set that gives kids (and adults) plenty of physical challenge, Yalp Memo also contains an educative dimension. The game posts with 360° touch screens give a balanced mix between fun and physically challenging. This is achieved through the entertaining and sporty games, which can be chosen by pushing the button on the master post in the middle and tap on the game icon on the screen. Thanks to its built in wireless internet connection, new Yalp Memo games can be uploaded from the gameshop, as new games are developed yearly.

Game examples

- **ABC**
  Hit the letters as fast as possible in the order of the alphabet.

- **Tag**
  Tag the pillar of your colour as it goes along the different posts.

- **Matty**
  Solve maths equations together with your friends.

- **Memory**
  A classic - a competitive, educational multiplayer game.

- **Switch**
  Team up and switch all the posts to your teams colour.

Yalp Memo
Pleasureworld
novelty award

The Memo was nominated by Pleasureworld for the contest ‘most innovative product in the recreational sector’ in 2014. Yalp received the majority of the votes from the audience and received an honourable record. The official jury report follows. “Yalp already received the Pleasureworld innovative Award several times in the past, with the interactive concepts Yalp Sona play arch, Yalp Sutu football wall and Yalp Fono DJ booth. The jury is very positive about the usage possibilities and the design of the play set: very solid and remotely controlled, which makes the game also applicable without supervision. The pillars and the floor can be designed to a particular theme.

Yalp keeps profiling itself as a trendsetter in the area of interactive playgrounds with the introduction of the Memo. The latest techniques are accustomed rapidly and Yalp knows very well how to apply newest methods. By repeatedly inventing new games, Yalp keeps providing new challenges over and over again.” The Memo contains a considerable playing surface on which children could play alone or with large groups. Due to the variation in games, the Memo is entertaining for many age groups. The flat surface also makes the Memo easily accessible for disabled children. Parents that play along with their children consider the Memo fun and quite challenging. This perfectly fits the current demand for a product that entertains the entire family, ‘family fun’.

Yalp Toro

The Sports court

The Yalp Toro was originally developed from the core idea of “Professional Sports Training through Play.” This was done in direct relation with Olympic Gold winning Dutch Field Hockey coach Marc Lammers. He used to play outdoors every day when he was young, nowadays he would find children behind their video game console. He found that both kids and adults that train for sports would benefit greatly from “messing around” with the ball in playful manner.

The Yalp Toro is a colorful field, wherein the traditional goals have been replaced by interactive panels. The goals with LED-lighting and touch-sensitive panels light up and react to (ball) impact. The angled corners and 4 opposite goals facilitate maximum fun, exertion and tactical game-play.

Game examples

**Bottle soccer**
Every player defends their goal, while attacking other goals. As they get hit, goal ‘drain’: coloured LEDs start fading. The ‘draining’ can be stopped by hitting the goal again. Last player wins.

**Red-Green**
When hit, each goal switches colour from red to green. Green and Red teams take each other on, with the aim to turn all 4 goals in their own teams’ colour.

**Switch**
Four teams with each their own colour are playing. Each team has two points. If a goal is hit, that team will lose a point and the other three goals will switch places. If your goal is hit twice, you are out and another team can step in.

Basic goal (3x)

Angled corners to have a more active gameplay

Touch-sensitive panels
The Yalp Toro is a sports field that challenges a very wide audience. Especially when the Toro used for sports activities such as football or hockey training. The Yalp Toro was developed from the ideas of former hockey player and hockey coach Marc Lammers. He concluded that children should have the ability to just try out things more and thereby get more skilled in a playful way. Furthermore, the four goals of the Yalp Toro sports court ensure a much more active game than with 2 goals.

Marc Lammers: “When my son was 7 years old, he didn’t want to join me to the hockey club anymore. There was nothing to do, was my son’s explanation. This is reality for many children at sport clubs. The consequences are worse than imagined. The children lose interest in sports or the parents quit visiting the sport club because their children don’t want to join them anymore. The Yalp Toro is a sports court that appeals to the current generation children and ensures fun for everyone.

Traditional sports courts and regular play sets at a holiday park have become standard. It’s hard to do without. Nevertheless, investing into these makes increasingly less sense - as they don’t set you apart from the competition. Therefore, a 5-star holiday park (‘t Rheezerwold) in The Netherlands, replaced one of its tennis courts with a colourful new sports facility, giving a whole new dimension to sports like tennis, hockey and football.

“At night, after dinner, this central square place becomes incredibly busy and lively. Large groups of children and teenagers play at the same time, often even together with their parents.” Explains Chiel, managing director at holiday park ‘t Rheezerwold, The Netherlands

Yalp Sona

The Play arch

The Yalp Sona is an interactive Dance & Play Arch. More specifically, it is an audio-guided play set, especially designed for outdoor. Games are played by motion. It has a motion detection camera on top, which registers the movement of the children on the play floor underneath. As perhaps the most versatile and inclusive interactive play set for young and old, able and disabled, over a 100 have been placed in schools, the public real, recreational facilities and even senior homes.

Game examples

- **Freeze**
  Dance as expressive as possible. Freeze when the music stops.

- **Code breaker**
  Remember the code and run to the correct numbers.

- **Dance battle**
  Actually dance battle: the best dancing determines the winner.

- **Reaction race Chinese**
  Learn to count in Chinese

- **Code breaker**
  Different animals are called out, find the correct animal sounds!

Sound output
The Yalp Sona experience goes beyond the accessibility guidelines as children of all abilities truly play alongside one another. The Yalp Sona is **truly inclusive, and completely accessible for wheelchairs, without being stigmatizing**. There are countless examples of less able children with mental or physical disabilities who completely light up when playing the Yalp Sona. Examples are a child that would usually remain non-reactive in every day situations, completely lit up when playing underneath the arch. Another child with heavy autism let go, moved her arms, danced and smiled! A special software package is available for this sector, whereby different games and calmer audio feedback can be installed. The speed and volume at which the games are played can be adjusted.

Furthermore, the Yalp Sona promotes intergenerational play as adults and children dance together. The Yalp Sona has become **very important healthcare innovation** for seniors. Exercising to the musically guided programs contribute to the well being of vulnerable elderly, especially to those that spend most of their days indoors. Not just for healthy, but also degenerating elderly, music remains rooted in the brain, even far into the dementia process. **Yalp Sona helps people with Alzheimer to become more mentally alert.** What is also great about having the Yalp Sona at senior homes, is that children and grandchildren love playing it as well and have fun underneath the dance & play arch together with their grandparent(s).

Yalp Sutu

The Football wall

The Yalp Sutu is an Interactive Football Wall, containing 16 impact-sensitive panels which measure and react to ball impact. Vivid LED lights and audio speakers give players feedback and encouragement on their performance. At least 10 different games are included as standard. The football wall is perfect as a low-barrier entertainment device for public area or commercial locations, but also for professional football training at the elite levels.

Game examples

**Speed Sutu**
Shoot as hard as possible. On the wall your speed will be shown in km/h. Many find it the most addictive game!

**Shape Sutu**
Shoot out the panels as they light up. Challenge yourself by shooting from further and further away. Who has the best shot?

**Time Sutu**
Hit all panels before the time runs out! Time speeds up with every round.

**Penalty Sutu**
Take penalties. Switch between keeper and shooter and win this knock-out game!

**Colour Sutu**
Conquer your opponent by turning the wall into the color of your choice (red or green)

The Yalp Sutu football wall does extremely well at virtually every type of recreation site. Why? Probably due to its incredibly high fun-value and almost addictive effect on those that play it. The “Reeenwissel” is a Dutch commercial camping site, which placed the football wall with custom fence work in 2013. Similar to all Yalp Sutu placements in recreation facilities, it is played almost non-stop during day time. Having a Yalp Sutu really sets the site apart from the competition, and many families with kids find it a reason to choose this camping site over another. Below, you will read the experiences this very happy facility owner has.

The football wall is a true and tested winner when it comes to plays set solutions within the recreation sector. Owner Tjitske Beerendonk explains: “Especially in this industry, average play sets can become outdated very fast. People want something new every year, otherwise they move on. The great thing about the Yalp Sutu is that it is constantly updated with new games and improved game play. It stays relevant and novel. People get hooked one year, and come back the next to be positively surprised with entirely new games and interaction!”

“The Yalp Sutu gives guests an experience they couldn’t get at home. It’s great for socializing and meeting new people as well.”
What’s in it for you?

✔ Is unique
✔ Inspires and challenges the new generation
✔ Renews itself (new games)
✔ Suits individuals and groups
✔ Appeals to both boys and girls
✔ Family fun, appeals to all ages
✔ Has great architectural design values
✔ Has a low threshold
✔ Can be controlled remotely
✔ Leaves room for free play and competition
✔ Results in an intensive physical work-out
✔ Secure investment, reliable and proven to be successful over the past 10 years

“The shopping mall is visited by children with their parents and even grandparents. It is hard to offer something fun for everyone. The Yalp Sona is right on target; dads and moms, boys and girls of all ages dance and play together with their grandparents. Everyone wants to know what it is and what it does... once you play beneath the orange arch, you don’t want to leave anymore.”

Rixt Wibiër - Council member, Enschede, The Netherlands

Design service

✔ Visualized design proposal
✔ Created by our design experts
✔ Without any obligations

Does your school playground need an upgrade and you need help with the design? Or do you have questions about safety regarding the public space? Our employees are playground experts and know all about sport and play in public spaces, the leisure industry, retail business, sport areas, etc. The success of the Yalp interactive sports and play equipment depends a lot on a good design. The playground designers at Yalp can create a visualized proposal that includes the desired play value needed at your location.
My Yalp tool

The Yalp interactives can be easily controlled by using the myyalp tool. Due to a 3G internet connection, you are able to alter settings remotely by using any kind of device with internet connection (mobile phone, tablet or pc). Your personal login also gives access to advanced usage statistics which can be monitored live.

- ✔ 3G internet connection
- ✔ Remote control with any device
- ✔ Change volume settings, choose on/off times
- ✔ Access to advanced usage statistics
- ✔ Change games
- ✔ Monitoring and service by Yalp

Screenshot of MyYalp dashboard
Product and warranty registration

Our promise is to make sure that our customers are able to enjoy our Yalp interactives worry-free for many years.

Besides the standard warranty of 10 years on steel parts, we also cover all electronic parts for a warranty period of 5 years. This includes free delivery of all electronic parts (new or refurbished) and electronic components of Yalp interactive products that require replacement if it is found to be defective due to faulty materials, workmanship or function within the warranty period. After this period Yalp would be pleased to extend the service agreement. Or this can be arranged for a longer period in this document up front.

Furthermore, our export managers can be reached for help and support at any time.

✔ 5 year warranty on electronic parts
✔ Product activation, to receive important software updates en checks
✔ SIM card and data subscription included
✔ Personal login to access the myyalp tool and gameshop
✔ Access to valuable usage statistics in myyalp dashboard
✔ Support and online training by Yalp

“Yalp is a forward thinking company, aiming to produce a meaningful synthesis between technological and active play.”

Phillip Snell - Milton Keynes municipality, United Kingdom

“All parkmanagers are looking back positively after the high season. The reactions of guests are very positive and the interactive play sets are constantly being used.”

Ruud Rerink - Product Development Manager Center Parcs, The Netherlands

“Yalp continues to establish itself as the trendsetter in the field of interactive play area, the memo is a good example!”

Hans van Leeuwen - Jury member Pleisureworld Novelties Award
We sport less and less outdoors. We spend a lot of our spare time in front of the tv or computer. Interacting with a computer and the excitement to reach a higher level in a computer game is addictive. This effect is also used at interactive sports and play. The digital temptations are converted to encourage children to exercise more. but what is interactive sporting and playing really? We asked our product developers Rob Tuitert and Thomas Hartong.

Interactive play is the link between the digital and real world. The game world challenges, brings variety, innovation in games. The real world brings, among other things, physical exercise outdoors and social interaction. So the best of both worlds. Our interactive products bring the solution towards today’s challenges, we live in a fast changing world with increased digitalisation. With our interactive products, we are meeting the demands of this new reality and the new generation, while ensuring the benefits of outdoor play. A swing or slide simply isn’t enough for today’s generation anymore.

1. Interactive sports and play is new, is it fully developed and properly functioning?

The World’s first interactive play set was launched by Yalp in 2006. Meanwhile, interactives such as the Yalp Sona have been placed in over 300 locations worldwide, and have won a great deal of awards. And we’re not done developing by a long shot! Our product portfolio will only broaden and deepen in the coming years.

The unique play solutions Yalp has created have not gone by unnoticed. We have received the following honours and awards:

- Pleasureworld Novelty Award 2006 - Yalp Sona Play arch
- Leisure & Sport Totaal Award 2009 - Yalp Sutu Football wall
- Pleasureworld Novelty Award 2009 - Yalp Sutu Football wall
- Pleasureworld Novelty Award 2012 - Yalp Fono Dje booth
- Building Holland Award 2012 - Yalp Sutu Football wall
- EU Profit Innovation Award 2013 - Yalp Memo Activity zone
- Red Dot Design Award 2014 - Yalp Fono Dj booth
- World Trade Center Export Award 2016
- Oranje Handelsmissie Fonds Award 2016

2. Why interactive sports and play?

Interactive play is the link between the digital and real world. The game world challenges, brings variety, innovation in games. The real world brings, among other things, physical exercise outdoors and social interaction. So the best of both worlds. Our interactive products bring the solution towards today’s challenges, we live in a fast changing world with increased digitalisation. With our interactive products, we are meeting the demands of this new reality and the new generation, while ensuring the benefits of outdoor play. A swing or slide simply isn’t enough for today’s generation anymore.

3. Will the Yalp interactives cause any noise nuisance in the neighbourhood?

The answers is no. The highest volume and on/off times of the interactives can be set by using the myyalp tool. To prevent sound to carry far, the interactives are designed in a way that the speakers are directed inwards, to keep sound mainly focused at the centre of the play set. The minimum sound level of the Fono in use is around 60dB (same as a normal conversation). The maximum sound level of the Sona in use is around 95 dB (same as a high volume stereo). As a rule of thumb, we advise not to place the interactives within 50 meters of the nearest residence.

4. Electronics outdoors, are you sure that’s vandalism proof?

The interactives are developed to withstand the tough conditions outdoors, according to EN 1176: 2008. All electronic components are housed in a solid steel or concrete construction. More than 300 installed interactives show that a computer in the public space is not a problem at all and that the products developed by Yalp are certainly vandalism proof. Examples are the Sutu Football wall at the Newtonplein in the Hague and the Fono Dj booth at Bijlmerpark in Amsterdam.

We have designed every detail to withstand every weather and usage condition. The product is made of high quality materials. All products have passed the vandalism tests with great success. For example, the impact resistance (1,000 × 50 kg), resistance at temperature differences (-35 °C. to + 85 °C.) and the resistance to shocks were successfully tested. We are convinced of the quality of our products, therefore every product comes with a 5 year warranty and service licence.
References

“We bring the digital world of gaming and adventures back into the real life. It is a very innovative concept, that was created in collaboration with our partner Yalp. The interactive Sutu football wall, Fono Dj booth, Sona dance arch and Memo activity zone combine the positive aspects of gaming with active movement in our indoor playzone.”

Andreas Sievering - General manager Fort Fun L.A.B.S, Germany

“As the statistics show, the Yalp Sona is still being used over 3 hours a day, every day! It looks like sports park West is becoming the most visited sports park in the city!”

Yves Schonmacker - Owner & Manager Sports park West, The Netherlands

“The equipment is a really unique and innovative way to encourage participation and activity within our parks. We like to be different and provide a variety of different elements for our visitors and have found that the items we have are really well used and well received by all.”

Aaron Niblett - Park officer Hertsmere Meadow park

“Even in winter the Yalp Toro gets played about 7 hours a day, as show by the monthly statistics. These interactive play sets make my animation team unnecessary, the children are enjoying themselves.”

Chiel Palstring - Managing director camping ‘t Rheezerwold, The Netherlands

“The Yalp Sona is a real success! One of our pupils usually shows no emotion at all, but when she dances underneath the Yalp Sona, she completely lights up! She moves, sways and smiles. It is a side of her that none of us had ever seen before... amazing, isn’t it?”

Christian Bruggeman, OCR ‘t Roessingh (special education) The Netherlands

The way forward

1. Orientation/ research phase
You’ve gained product information and showed interest in interactive sports and play equipment.
✔ Knowledge about product possibilities
✔ Rough idea of product opportunities
✔ Answers to some questions
✔ New questions occurred

2. Getting into detail
Probably a lot of new question occurred. Therefore our export service team is on hand to answer all your questions. One of our interactive experts will contact you to get into details in an initial conversation by phone or email to determine:
✔ The most suitable solution for your situation
✔ Customization wishes, such as; flooring design, different colour(s) or adding custom made elements
✔ Which realization steps are needed to achieve the best result

3. Book a showroom/ reference visit
We believe our products are experienced best if you have given them a try yourself. Therefore we would like to invite you to visit our showroom and competence center in The Netherlands, where our products are tested and demonstrated.
✔ Play all the games
✔ Full product demonstration
✔ Meet our designers
✔ Experience Dutch hospitality

4. Design and proposal
Our playground design team will create a design plan, that meets your desires. This can either be a complete landscape design plan for the entire area or a custom design sketch of the interactive play set.
✔ Visualized design proposal
✔ Created by our design experts
✔ Free of charge and without any obligations
✔ Custom made offer

5. Ordering and project support
We work with a network of partners and distributors in over 18 countries. Yalp will get in touch with the nearest Yalp interactive distributor, arrange the project design transfer and export of the interactive product for installation.
✔ Transfer to local partner
✔ Transport
✔ Installation

6. After service
Customer satisfaction is very important to us. We want every customer to be happy with our products. Therefore we provide a warranty and service licence of 5 years on all electronic parts, to make sure you can enjoy the product worry-free. Furthermore, our export managers can be reached for help and support at any time.
✔ Product activation
✔ Access to myyalp online tool
✔ Online training
✔ 5 year warranty on electronic parts
